Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 6,9. 6) ☐ Other:

1. With respect to the copies of the 1449's provided to applicant in this office action, any references lined through have not been considered because not translation and/or statement of relevancy has been provided by applicant (they are not in English). See 37 CFR 1.97 and 1.98.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 35-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Menard (6231554) in view of Mattingly (4608047).

Concerning claims 35,40-44, Menard discloses a sanitary napkin that has an absorbent pad that comprises a cover 8, absorbent 7, and baffle 9. The garment attachment panels are 19 and extend from the underside of the absorbent pad as claimed. The attachment panels function as claimed (downward deflection of side

edges, etc.). Menard does not disclose that the attachment panels have mating fastener elements and does not disclose the claimed dimensions for the fastener elements.

Mattingly discloses a sanitary napkin with flaps. Mattingly discloses that it is undesirable to have adhesive from the flaps stick to the bottom of the undergarment. Mattingly discloses that mating fastener elements are preferred such as shown in figure 11. See column 6, line 20 to column 7, line 5. Mattingly discloses that by having mating fastener elements as shown in figure 11, adhesive sticking to the undergarment can be avoided. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Menard with overlapping flaps with mating fasteners as disclosed by Mattingly (figure 11) so that the problem of adhesive sticking to the undergarment can be avoided.

With respect to the recited dimensions for the fastener elements they are considered obvious to one of ordinary skill in the art because the recited sizes are of a size that would be appreciated by one of ordinary skill in the art. The sanitary napkin of Menard will function the same if the fasters are the claimed size or of a size just outside of the claimed range so this limitation does not patentably distinguish over Menard. See *Gardner v. TEC Systems, Inc.*, 725 F.2d 1338, 220 USPQ 777 (Fed. Cir. 1984) *cert denied*, 469 U.S. 830, 225 USPQ 232 (1984).

Concerning claims 36-39, the napkin of Menard is fully capable of the claimed functional language.
